Employment

Senior Software Developer | **FTI Touristik** | **Feb 2017 - Present**

FTI Touristik is a leading travel agency in Germany that provides deals on car rentals, hotels and flights to end users and other travel agencies. I'm working on FTI's car rental solution, drive.de, which is integrated in many tour portals and content tools as a B2B solution. *Angular.js, PHP*

Software Developer | **Onedio** | **Jun 2014 - Jun 2016**

Worked on improving onedio.com, a social content platform that has 20 million unique users, generating 220 million page views monthly.

- Reduced bandwidth costs 1/3 by serving GIFs as HTML5 videos. *Node.js, JavaScript*
- Developed 15+ mini-apps that were used/played 20+ million times, and was shared on social media 1.4+ million times in total. *Node.js, MongoDB, JavaScript, Babel, HTML*
- Managed a few micro services of the product and supervised release processes.
- Developed services, added new features, improved and optimized existing ones for onedio.com. Created tools, services and consoles to help content, ads and analytics teams operate better and worked on the i18n implementation of Onedio. *Node.js, Angular.js, MongoDB, DynamoDB, Redis, ElasticSearch, AWS, HTML, CSS*

Junior Software Developer | **Noktacom Medya** | **Jan 2013 - Jun 2013**

Software Developer, Intern | **Noktacom Medya** | **Summer 2012**

Developed for izlesene.com, Turkey's leading video network that has 10 million unique Turkish users, generating 210 million page views per month.

- Created a SmartTV app of izlesene.com to enable users to watch videos on SmartTVs. *JavaScript*
- Developed an API for Izlesene mobile apps. Optimized service via caching. *PHP, MySQL, Redis*
- Created new product features and improved existing ones. Performed bug fixes and optimizations. Developed management and analytics consoles for content managers and BI executives. *Node.js, PHP, MongoDB, MySQL, Redis, JavaScript, HTML, CSS*

Education

Ankara, Turkey | **Bilkent University** | **Sep 2009 - Jun 2014**

- B.S. in Computer Technology and Information Systems, Jun 2014. CGPA: 3.13.
- Undergraduate Coursework: Databases; Algorithms; Programming Languages; Web Development; Computer Networks; Computer Graphics

Projects

- Locally.js (2015). Locally.js is a JS library for localStorage management that provides expirable items with timeouts and compression. The project has 300+ stars on Github.
- Streamuch (2014). Geolocation based live streaming service with a web interface and iOS / Android mobile apps. I co-developed this project as my senior project at Bilkent University. It was chosen 2nd best among 16 projects. *Node.js, Angular.js, MongoDB, Java for Android*

Languages and Technologies

- JavaScript; Node.js; PHP; HTML; CSS; C++; C; Java; SQL
- MySQL; MongoDB; DynamoDB; Redis; ElasticSearch
